

MAD PROFESSOR MELLOW YELLOW TREMOLO

Mad Professor MELLOW YELLOW TREMOLO (MYT) is a true sine wave tremolo effect designed for tremolo tones from the of 50's type soft swing to deep modulation with great playability, regardless of tremolo depth or speed. Strength of incoming signal is modulated by a sinusoidal oscillator, just like in the

early amps, and modulation bias is set to give symmetrical modulation.

This gives a very musical tremolo effect that blend very well with both clean and distorted guitar tones.

The MYT has a level control that allows you to even boost the signal for a more powerful effect.

Like all Mad Professor pedals MYT is hand made in Finland using only premium components, to give years of trouble free operation with superb musical tone.
